

## PRESS RELEASE

### OPHIR CORPORATION WINS NEARLY \$5M CONTRACT FOR CONTINUED SUPPORT OF THE B-2 BOMBER!

**September 16, 2011** —Littleton, Colorado     Ophir Corporation

Ophir Corporation is pleased to announce an award from the Defense Logistics Agency for the production of Optical Assemblies in support of the B-2 Bomber program.

"We are so pleased to receive this multi-year award for production of this laser radar. This work certainly ensures the continued success of Ophir's laser radar production capabilities," reported Martin J. O'Brien, President of Ophir Corporation.

Ophir Corporation is a high technology development and manufacturing company providing unique laser radar sensor solutions for demanding environments. The company's ground-based and airborne remote sensing and atmospheric characterization expertise includes optical air data systems, wind and turbulence measurement, range/velocity lidar and aerosol lidar. Ophir is a small business and is an AS9100B and ISO 9001:2008 certified aerospace contractor.
